

TEAM #1

- A severe earthquake occurs on the Green Valley fault, causing heavy damage in parts of Walnut Creek, Concord and Pleasant Hill. After making sure your home and family are safe, what do you do?
- What actions might the CERT Incident Commander take during the initial period after arriving at the Staging Area?

TEAM #2

- One of the key roles of CERT is to gather information in the neighborhoods and to assist their neighbors if it is safe to do so.

Talk among yourselves and decide how you would approach this mission --- who is in charge? What equipment or other resources might you need?

Write it down! This is the beginning of an Action Plan.

TEAM #3

- You are in charge of Logistics.
- What kinds of supplies will you need to support the CERTs?
- If they are not available in your CERT area supplies Cache, where might you find them?

TEAM #4

- You are in charge of Plans. You need to keep track of everything that is going on so you can keep the Incident Commander up to date.
- What supplies or equipment might you need? Where would you go first to get it?

TEAM #5

- Injured people begin arriving at the Staging Area. Who does what?
- People are dropping off stray cats and dogs at the Staging Area. There are no crates, food or resources to assist animals. Who does what?

TEAM #6

- The City wants to know the overall status of your neighborhood. Who does what?
- People are demanding that they be given the food stored in the CERT cache for CERT volunteers. Who does what?
- A neighbor come to the Command Post and says he can hear moans coming from the garage next door but no one answers when he asks if they need help. Who does what?
